

25th Anniversary of the SEACEN Centre
Congratulatory Note by Governor Dr. Zeti Akhtar Aziz

The SEACEN Centre has for 25 years had a pivotal role in strengthening regional cooperation and collaboration among the Central Banks in the region. The SEACEN Centre has also had an important role in supporting the human capital development in the regional Central Banks. In an increasingly more challenging environment, the investment in human capital development becomes even more important. The organisational capacity of Central Banks needs to be continually enhanced. The SEACEN Centre has an important role in realising this objective.

Our shared vision for the Centre is to evolve into a premier regional training centre that supports the development of a new generation of high calibre central bankers. The research undertaken also needs to support this endeavour. In this regard, Bank Negara Malaysia reaffirms its commitment and continued support to the Centre and wishes the Centre every success in realising this vision.
